

We are advocates for a more balanced, less meat-heavy diet. Regardless of the role of meat and dairy in nutrition or the ethics of animal rights, on the grounds of economic and ecological sustainability alone, the consumption of animal products is a looming problem for humankind. Our middle finger salute is aimed towards unethically treated and unsustainable, mass produced meats.

THE AMAZEBOWLS

matcha & coconut, avocado, spinach, coconut oil, coconut mylk, strawberry, banana, coconut shavings, lime & coconut granola

matcha

\$10

MATCHA
M Y L K B A R

our menu is 100% plant based

Throughout history, there have been groups of people who appear to have inherited longevity.

Nutrition researchers have scoured the Earth to discover the environmental factors that create clans of happy and healthy centenarians. Their discoveries narrowed down a list of five regions where people lived longer than average while exhibiting higher levels of happiness than the rest. These are called "Blue Zones".

Lifestyle factors common to these regions include a very high consumption ratio of plant materials to meat, exceptionally clean air and water alongside a continuously active life. There is also a distinct lack of unethical, mass production of meat by individuals who care more for money than they do for health.

"Nothing will benefit human health and increase chances of survival of life on Earth as much as the evolution to a vegetarian diet."
Albert Einstein

The idea that "you are what you eat" is becoming increasingly relevant to society; doctors are prescribing nutritional components to healing profiles as people strive for a more holistic, balanced lifestyle. The push for local produce is as strong as it has ever been as we become more aware of how our food choices impact the earth. Matcha Mylkbar loves this, because we love you.

We believe plant based dining is the future of food, as it works completely in synergy with your most important health commodity; you. The practice of plant based eating is sustainable, reduces pastoral chemical use and reinvigorates the connection between the primary producer and the consumer. Not to mention, its effects on general wellbeing are clearly being felt across the population as more and more people embrace this way of eating. Basically, understanding is happiness as we truly allow food to "be thy medicine and medicine be thy food" #Hippocrates

Our food offering here is a simple, plant based menu that emphasises the incredible, diverse combinations exhibited daily in Blue Zone regions. Our aim is to supplement your active life with tasty catalysts towards happiness and health. We are not reinventing the wheel, we are providing you with exposure to ways we can make the wheels turn for longer.
